

DataGuardian AI - Customer Success Stories

Case Study 1: Financial Services

Challenge: A leading investment bank struggled with maintaining compliance across their massive data lake infrastructure.

Solution: Implemented DataGuardian AI's automated classification and governance platform.

Results:

- 85% reduction in manual data classification efforts
- \$2.5M annual savings in compliance costs
- Zero compliance violations since implementation
- 100% data visibility across all cloud platforms

Case Study 2: Healthcare Provider

Challenge: Major healthcare network needed to ensure HIPAA compliance while scaling their data analytics.

Solution: Deployed DataGuardian AI's healthcare-specific classification models and governance framework.

Results:

- 99.97% accuracy in PHI detection
- 72% faster compliance reporting
- 50% reduction in false positives
- Automated HIPAA compliance monitoring

Product Features

1. Intelligent Data Discovery

- Automated sensitive data detection
- Custom classification rules
- Real-time monitoring

2. Compliance Automation

- Pre-built compliance templates
- Automated reporting
- Audit trail generation

3. Integration Capabilities

- Native cloud platform support
- API-first architecture
- Custom connector framework
