Endpoint: **POST** /businesses/funding\_and\_acquisition/enrich

## Description

The **Funding and Acquisitions Enrichment** endpoint provides **detailed insights into funding rounds, acquisitions, and IPOs** for over **300,000 private and public companies**. This data helps users track **investment trends, company growth, and market positioning**.

The dataset includes **up to 10 of the most recent transactions per company**, updated quarterly, and covers key funding details such as investors, deal values, and company valuations.

## How It Works

- **Input:** Provide a `business_id` obtained from the **Match Businesses** API.
- **Processing:** The system retrieves funding history, acquisitions, and IPO-related data.
- **Output:** A structured response with investment details, key investors, and historical funding rounds.

## Example Request (cURL):

Bash

```
curl --request POST \  
  --url https://api.explorium.ai/v1/businesses/funding-acquisitions/enrich \  
  --header 'accept: application/json' \  
  --data '{  
    "business_id": "1234567890"  
  }'
```

```
--header 'api_key: your_api_key_here' \
--header 'content-type: application/json' \
--data '{
  "business_id": "8adce3ca1cef0c986b22310e369a0793"
}'
```

## Best Practices

- **Monitor funding rounds** to identify fast-growing companies and emerging market leaders.
- **Leverage acquisition data** to track industry consolidation and M&A trends.
- **Use IPO insights** to evaluate newly public companies for investment and competitive analysis.
- **Cross-reference funding data** with firmographics and financial metrics for deeper insights into company growth and financial health.

## Funding and Acquisition Output Signal

Field Name	Description	Data Type
domain	Domain name associated with the company	Optional[DataTypes.Domain]
company_name	Official name of the company	Optional[DataTypes.OrganizationName]
investors	List of investors who have funded the company	Optional[List[str]]
